Project Title

Rationale/Background: Briefly describe (1 paragraph or less) previous findings or observations that provide the background leading to this proposal.

Specific Aims/Hypothesis: List 1-3 goals of the proposed project (e.g. address how your project will be of interest to medical education community and include any relevant hypotheses, if applicable).

Methods, design, and statistical analysis plan: Briefly describe (1 paragraph or less) the methodological approaches that will be used to design the project and collect & analyze data. Consider appropriateness and feasibility of project.

Expected outcomes and dissemination plan: Briefly describe (1 paragraph or less) the outcomes that will be assessed for your proposed and potential plans for dissemination including but not limited to: local presentations, regional or national conferences, and/or publication (peer-reviewed journals or medical education repositories such as MedEdPortal)

Proposed mentor committee members: Please list three faculty members that will serve on your medical education scholarship mentor committee and have committed to meet, at minimum, semiannually.

Please submit all materials to [Melissa M. Tavarez, MD](#)
